Available colors :

The tyvek wristband has a small RFID tag (= RFID inlay) glued to the inside. It is a single-use wristband that can be adjusted and closed by means of an adhesive zone. Once attached to the wrist, it cannot be removed to exchange it with another person. It can be personalised with a text or a logo (to be provided in vector format .ai, .eps...).

Advantages of the RFID Tyvek bracelet

The RFID technology allows a contactless use, especially for :

- opening doors, lockers...
- contactless payment.

It also allows the limitation of the use by programming schedules.
